Security-conscious companies and managed security providers are confronted with an increasing number of gateways in their networks. Managing hundreds or thousands of systems can require a costly, time-intensive process by qualified staff. The Barracuda NextGen Control Center can significantly decrease administrative overhead.

**The Barracuda Advantage**

- Increased security and reduced costs
- Revision capabilities and easy restoration of proven configurations
- Simple drag & drop configuration and visualization of VPN tunnels
- Fully scalable to grow with organizational needs and requirements
- Disaster recovery within a few minutes using only two configuration files

**Product Spotlight**

- Powerful, scalable, industry-leading central management
- Comprehensive revision control system
- Consistent security posture and policy enforcement across the entire enterprise
- Integrated Public Key Infrastructure (PKI)

**Cost Efficiency**

The Barracuda NextGen Control Center gives full control over system administration costs.

**Lifecycle costs:** Central update management drastically lowers the time spent deploying patches. Even Barracuda NextGen Firewalls F-Series, with different software versions can be centrally managed at the same time.

**Deployment costs:** Using the Barracuda NextGen Control Center, rollouts with hundreds of devices can be completed within a few weeks instead of months.

**Operating costs:** The Barracuda NextGen Control Center helps to significantly reduce the cost associated with security management while providing extra functionality both centrally and locally at the managed gateways.

**Security Management with Ease**

Firewall rulesets and other security policies, as well as, software patches and version upgrades are centrally controlled from within the management console. Deployment can be scheduled and applied to all managed devices. Highly customizable administrative roles allow delegation of administrative capabilities for specific departments or locations. Administrators are kept informed at all times on the status of remote gateways and can implement centrally defined security rules at every location. Furthermore, the integrated revision control system provides easy audits and cuts overhead.

As a company with internationally distributed facilities, the centralized management concept particularly impressed us – Barracuda therefore quickly became our partner of choice.

Manager of IT Service and Infrastructure Technology, ODLO Sports Group AG
## Technical Specs

### Configuration Management
- Multitenant capabilities
- Configuration templates
- Object database and template repository
- Firewall/VPN policies, application gateway parameters
- Flat file data storage
- Database characteristics (transaction, orientation, locking, etc.)
- Easy configuration backup & restore
- Speed install support via USB key
- Configuration update monitoring
- Full RCS versioning
- VPN graphical tunnel interface
- Barracuda Networks Access Client policy management
- Multi-release management
- Multi-platform management

### License Center
- License template repository
- Object database and configuration tree
- Role-based administration
- Configurable access notification
- Multiple groups per administrator
- Configurable access notification

### Status Monitoring
- Gateway health state
- Launch pad functionality
- Customizable layout
- Barracuda Earth support

### Central Software Update
- Real-time version display
- Kernel and OS updates
- Barracuda NextGen Firewall F-Series updates
- Update log viewer

### Secure Remote Execution (SSHv2)
- Job scheduling
- Script management
- Execution log viewer

### Administration Models
- Fully GUI-based access
- Strong authentication & AES encryption
- Role-based administration
- Adjustable view on configuration tree
- Configurable administrative domains
- Multiple domains per administrator
- Configurable access notification

### Support Options
- Standard technical support
- Firmware updates
- IPS signature updates
- Application control definition updates

### Instant Replacement Service
- Replacement unit shipped next business day
- 24/7 technical support
- Free hardware refresh every four years

### Additional Functions
- Integrated DNS server
- High availability
- SIEM syslog interface
- Public Key Infrastructure
- Revision Control System
- Access Monitor
